How a mahjong win pays

Start with the value on your card. Then check how you won and whether the jokerless bonus applies.

On a discard

The discarder pays twice the hand value. Each other player pays once.

Winner receives 4× the hand value.

Self-picked

Each of the other three players pays twice the hand value.

Winner receives 6× the hand value.

Jokerless? Check eligibility first.

For an eligible hand with no jokers, double the card value first. Then apply the payments above.

No extra bonus for Singles & Pairs. Quints hands on the supported NMJL card require jokers and cannot earn the jokerless bonus.

Example: a hand worth 25

All numbers use the same unit. If 25 means cents at your table, 100 means $1.

How you won	Discarder pays	Others pay each	You receive
On a discard	50	25	**100**
Self-picked	—	50	**150**
On a discard **Eligible jokerless**	100	50	**200**
Self-picked **Eligible jokerless**	—	100	**300**

Also remember: a win completed by joker exchange is self-picked. Dead hands still pay. Check the hand and its value on your card.

Four-player reference. Agree on points or money, limits and any wall-game pot before play. The pot is separate from these payments.
